### Local & General

Mr. and Mrs. Roy Luchia spent the 24th, visiting at Clyde.

J. D. Henderson spent the 24th at his home in Lethbridge.

Mr. and Mrs. A. M. Watt of Brant spent the 24th with Mr. and Mrs. Geo. Depue.

I. Granlin and W. Harlie were visitors in Lethbridge on Wednesday.

Champion golfers were defeated in a tournament at Barons by 42 points.

Born—To Mr. and Mrs. Fred Fleming, in the Vulcan Hospital, May 21st, a daughter.

W. C. Fry of Spokane, Wash., was in town last week looking after his farm interests.

One and one sixth inches of rain fell on Saturday. Since April 20, an average of one inch of rain in a week has fallen.

Mrs. McElroy of Carbon spent a few days visiting at her home.

F. J. Clapp spent a few days in Calgary this week.

Mrs. H. N. Heal's mother, Mrs. Turner of Magrath, who has been a visitor here, returned to her home on Saturday.

Mrs. Collison has been a visitor at the home of her parents, Mr. and Mrs. E. Larkins.

Mrs. J. M. Moffatt entertained at four tables of bridge on Thursday last. Prizes were won by Mrs. Gottenberg and Mrs. Bell.

Mrs. Vanbusken and George Duquesne left Friday for eastern Canada by car.

Joe Mark visited his father, G. H. Mark during the week.

Mr. Portier was a business visitor in town over the week end.

E. Latiff is convalescing after a relapse.

Miss K. Watkins of Carbon spent the holiday at her home.

Campbell's Store and Sisson's Cafe have been in the hands of the painter during the week.

Summerfallowing operations have commenced in most parts of the district.

The Village council is to be congratulated on putting in a cement crossing leading to the Community Hall.

Mr. and Mrs. J. M. Moffatt and family motored to Lethbridge Saturday in celebration of Eric's eleventh birthday.

Mrs. Cook of the Gleichen school staff spent the weekend as the guest of Misses Edna and Augusta McNaughton.

Fishing parties to Lake McGregor are quite numerous from this vicinity. Up to date no reports have reached us as to the results.

J. M. Moffatt is to be commended on the boulevard added to the front of his premises. While a lot of work was involved the results obtained are eminently satisfactory.

### Mrs. C. Versluyis is Honored

The Amity Club was entertained at the home of Mrs. P. M. Patterson on Tuesday afternoon. When the dinner was served a number of guests made it an occasion to shower Mrs. C. Versluyis—nee Miss Rhea Higgins.

During the afternoon the guests of honor were invited to take a chair before the table with mysterious looking parcels and instructed to open them. parcel was Margaret Patterson assisting her.

The many gifts which were lovely and varied included kitchen utensils, a radio, embroidery hoop, a picture and the bride of a few years ago before showers were instituted were filled with envy.

After everything had been duly acknowledged, Mrs. Patterson accepted her appreciation and thanked her friends fittingly.

Delicious refreshments were then served by the hostess all on wedding day which had been handed down from the previous year. The bride having the honor of drinking tea from a cup over eighty years old, which had been part of the wedding china belonging to Mrs. Patterson's grandmother.

Entertainment was come on end to every joyous occasion and after repeating their good wishes for the young people who are starting life together, the members of the Amity Club separated to once more take up the household tasks of "feeding the men" supper and chasing chickens and turkeys.

With seeding finished and the great bulk of the crop sown and looking about so well as possible, could there be greater satisfaction with the young people? It would appear that there will be a slight decline in the acreage sown to wheat this year, but more coarse grains have been sown according to available information.

Mr. and Mrs. S. Milliken and Mr. and Mrs. Lou Milliken returned from a visit to the Peace River country. They were highly impressed with the country. While there they filed on four homesteads, and will return to take up residence in the latter part of June. Mrs. Milliken will establish a nursing home at Hythe, Alberta.

While in Peace River they visited at the home of Mrs. Philpott and found them in excellent health and very much taken up with the new country to which they have located.

Vulcan was the only town in this section of the country that undertook to celebrate May 24. A high wind accompanied by dust and rain was unfavorable to any kind of outside sports and all participants were forced to return home.

With trees and hedges in full leaf the appearance of town and country is wonderfully improved. A lilac bush in full bloom, in front of Dr. Freeze's residence is receiving unstinted admiration by passers by.

Cleaning up in Champion has made rapid progress during the past two weeks and it should not be long before the town will have a clean bill of health, as far as sanitary conditions are concerned.

The C. W. L. tea held at Mrs. Farmer's home Saturday was well attended. The doll was won by P. Holm. The members of the League wish to thank all who helped to make this event a success.

Wednesday afternoon was omitted from the usual half holiday routine, owing to Tuesday having been a holiday.

## NOTES AND COMMENT

We reckon there is more confused thinking around these questions than on any other question that comes before the public from time to time. And it does come up whenever there is a depression. The extent of sentiment at the moment is indicated in the following news item:

"The demand for cheap money voiced by the debtor class is again evident throughout the country, emanating largely from the agrarian parts of the west as in the decades of hard times culminating in the free silver campaign of 1896. Prices have declined to such an extent that it takes twice as many bushels of grain to pay the debts of the farmer as when he contracted them."

We hear and read so many conflicting statements concerning the best way to get out, and about what the effect of different policies would be, that it is hard for any of us to try to reason the thing out with any assurance of logical, sound conclusions. A very interesting discussion article was recently published in a pamphlet written by a business man, and sent to us by one of our subscribers. We are glad to pass on to our readers the following points, in the belief that they will contribute to some measure of understanding of this vexing question. At least we have been able to get something out of them, and hope that others will:

"Cheap money is nothing new. It has always been except the unwary and gullible. Trying to correct the present depression by the issuing of cheap currency can only add chaos to a bad situation. It is a common old trick... as it always has in the past, to set two standards of value—one based on present money, and the other based on cheap money, whether the latter be in gold, silver, tin, or some other scheme."

"Talk of breaking silver a basis for money.... What a bonanza it would be for the silver mines, the pawn-brokers of the world, with tons of loose silverware, and the tons of silver in the hands of the world population, if it swamps the world as was started."

"Take England today, for instance. Do you suppose the British banker would dare to issue a new coin and stealing on the basis of \$3.45, the selling price of their flat exchange? Hardly. Their gold is still worth \$4.80 in American money. Did you ever consider what a farce and a farce right now in Liverpool, for real gold money? Figure it out. On the basis of gold, the Englishman can buy wheat in his own market at 35 cents or less."

"Real money never competes with the spurious. The silly idea that commodity prices rise when cheap money is put into circulation fools only the unwary, who think that the drop in purchasing power of their spurious money is a good indication. But gold or its equivalent never suffers.... Cheap money always drives real money into hiding, and, finally, real money comes out of hiding and drives the spurious out of existence. That is history, regardless of laws, theories, or any other bank."

In passing on these comments it is recognized that this question is a ticklish one to discuss, people feel so hot on it, one way or the other. It is not the aim to stir up controversy, but to contribute to thinking

Samie had found a job for the week on a railroad section gang, and was taking leave of his family when his wife came to the door and shouted:

"Come back, Sam. You have to come back, we'll be alone and you'll be gone a week!"

The Negro turned and looked very much aggrieved.

"Honey," he said in a tone of injured innocence, "what's de mattah? You all talk as though Ah was taken dead ax with me."

A new machine, it is claimed, induces sleep by means of a low, humming sound. Would a mosquito in the room answer the same purpose?

Adaptation and use of common caragana (arborescens) for hedges and related purposes in the provinces of Canada is recommended by the fact that 2000 lbs. of seed were collected and sold in 1931. Enquiries concerning the care of this hedge prompts a summary of the most important facts.

Caragana should be started in a permanent location from seed, and thinned to a required distance. It is preferable to start with young trees. A summerfallow strip, wide enough for this form of vegetation is preferable. Caragana should be sown a foot apart and planted in early spring; a single row is preferred, and it is advisable to set them a little deeper when transplanting. In order to encourage strong growth, one year old trees can be cut back to within an inch or two of the surface; cut back to almost a foot in length the second season, and trimming to the desired shape can start the third year.

After a caragana hedge has been established, trimming is necessary every year. At the Dominion Experimental Station, Scott, caragana hedges are trimmed during the last week of June. After that date there is sufficient growth to cover the hedge. These appearances can be better maintained by trimming off irregular second growths a few weeks later.

Just what permanent shape should be maintained is a matter of taste. A rectangular shaped hedge lacks the gracefulness of one which incorporates gentle curves. It is preferable from a standpoint of balanced appearance to have the top rounded, or slightly increased at the base. A rounded surface at the top offers a pleasing appearance. Future width should be borne in mind, so that it is often necessary to trim back almost to the old wood every year.

So to the six Goodyear Tires of various sizes, types and ply-thickesses at any Goodyear tire dealer's, then estimate the number of cords in each, add the six individual tire estimates together, and divide by six to strike the average. Submit the number you estimate on the entry blank which may be obtained by charge at any Goodyear tire dealer's.

A section of tire fabric showing the Supertwist cords, on display in every Goodyear tire dealer's store. This will help you make your estimate.

The closing date is June 5th, 1932. No entry bearing a later postmark date will be considered. Address: "The Goodyear Supertwist Cord Contest," New Toronto, Toronto 14, Ontario.

Dominion and Provincial Entomologists have stated that a severe grasshopper plague threatens parts of Alberta, Saskatchewan and Manitoba this summer. In Alberta the affected area is south of Calgary and east of a line from Teulon to Lethbridge.

In Saskatchewan it is expected to be south of Saskatoon and west of a line drawn from Saskatoon through Regina on to the international boundary at the junction of the Assiniboine and Saskatchewan boundary lines. In Manitoba it is roughly in an area south of Teulon and extending from about Deloraine in the west to Giroix in the east. In addition there is a small area around Oak River and somewhat of a larger area around Dauphin.

It will thus be seen that the bulk of Alberta north of Calgary will be under attack, and the large part of Saskatchewan north of Saskatoon and the whole of Saskatchewan east of the line Saskatoon-Begin.

**Liberty vs. License**

The kidnapping of the Lindbergh baby, culminating in the finding of the body of the murdered infant, has served to focus public attention in the United States on the subject of kidnapping in particular, and on the right of which lawlessness has developed in the country. Thousands of people are aroused now who formerly regarded with indifference the daily record of murders, kidnappings, bootlegging outrages, and other gangster crimes, including open warfare between these gangs in the streets of large cities, which filled the columns of their newspapers. There is now a searching for causes of this growing lawlessness in the United States, but which is not characteristic of other countries.

And in seeking for the underlying cause, investigators have found they had not far to go, and that it is necessary to delve into many great depths to discover wherein lies the basic weakness upon which present day American society is founded. It is for the people of the United States to apply their own remedies, but the prevailing state of affairs across the imaginary border line, and the causes therefore, should have a lesson for the people of this Dominion.

Mistake number one was made in the United States when they went from one extreme to another—that is, from the extreme puritanism of the early New England settlers to the almost uncontrollable license of later days. From an era of unyielding, rigid strictness "severity" in the application of law, the United States set up a system of personal liberty. In reaction against what had been, the public schools were made purely secular, the teaching of religion, the precepts of the Bible, and the moral law which is founded in true religion, were banned. It was argued that the churches and the home should alone concern themselves with religion and morals, and that the state should not enter such spheres, but, remaining strictly secular and neutral, let youth in its most plastic, character-forming years be trained, or not trained, in the home and on one day in the church or Sunday School.

The net result was that millions were not trained, Sunday became a holiday, a day of sports and amusement, and a home of pleasure rather than of religious worship. The result—Sunday was over looked and neglected. And the children of these millions, and their children in turn, grew up in an atmosphere almost entirely secular, pleasure loving, taught to cater to their personal appetites and passions, rather than to look upon life and its responsibilities and opportunities as a serious thing.

But mankind must have a god to work by, looked for a life of present, a life of personal gratification, tons of millions in the United States set up and worshipped the Almighty Dollar as their god. The man who could amass great wealth was a "great" man. He was the one looked up to in the community, to whom others paid deference, and who was held up to the youth of the day as a worthy example to follow. The more money a man had, and the quicker he got it, the more successful he was held to be, the more he was envied and envied.

It was natural and inevitable, therefore, that the ingenuity of men was directed to discovering "get rich quick" means and methods. The morality, the lawfulness of the methods used was less important than the gain.

The methods of "Business" were not always good. A century ago the treatment meted out to the Indians of the western plains who were robbed, plundered, murdered and their lands taken from them, now have their counterpart in the gangster methods of bootlegging, kidnapping, and all forms of organized vice and crime.

The United States, too, has made a god of "Business." "The biggest tree in the forest," is the motto. Everywhere the thought is heard that this or that is the biggest in the world. In the race to create big cities they have created breeding grounds for crime; in the race to create mass production industries they have created mass unemployment leading to want and suffering and more crime. The very inventions and machines created by the United States, which were the result of the criminal intent to do, defend, destroy and defeat people.

Finally, the United States set up another god in the name of "Liberty," but which was so freely interpreted that it quickly became license. Liberty is a fine thing; it is the birthright of all people although through the ages man has wrongfully denied it to his fellow man. Possessing the power for the protection of the individual, the right of property, the right of conscience and entirely different things. Liberty can only be enjoyed where there is law and order; law impartially but strictly enforced that order may be maintained. Let law be weakened and brought into contempt and liberty is destroyed. Might not right then take the upper hand, liberty is lost, and all become the slaves of might.

The United States today, to a greater extent than any other nation on earth, is paying the penalty for disregard of the true tenets of religion and of moral law which is based and founded in these religious tenets, and because it has seen fit to set up other false gods to worship. The worship of the "Golden Cal" sent an old world nation wandering in the wilderness for forty years. It paid the price of slavery. Other nations since then have paid. The United States is paying now in the form of the lawless elements it has developed are now laying upon it. And all nations will inevitably pay if they disregard moral laws and replace true liberty with license. That is the lesson for the people of Canada to take to heart.

**Brought a Surprise**

D. C. Coleman, of Charlottetown, W. Va., doesn't say detectives are dumb but he isn't taking any chances. He dropped in at the police station to say some one had stolen his salt and pepper set. With him he brought a package of salt and pepper, carefully mixed so that the sleuths couldn't go wrong.

Husbands who double up with mirth when the wife has difficulty in driving through a 10-foot garage door usually sober up when they try to thread a needle.

**Sorry To See Night Coming  
She Could Not Sleep**

Mrs. K. McElroy, Kirkfield, Ont., writes—"I was very nervous and run down, was short of breath, and had something feelings, and was scared to night coming as I could not lie down or go to sleep."

I was advised to use Milburn's Heart & Nerve Pills. I took several boxes and am completely able to sleep all night, and have gained weight."

**THE CHRONICLE**, CHAMPION, ALBERTA

**League of Nations**

**Greatest Human Agency For Preserving Peace, Says Sir Robert Borden**

Expressing the belief that the League of Nations is educating the world to peace, Sir Robert Borden, Canada's war time premier, told the League of Nations Society in Canada, at its annual meeting at Ottawa, that he believed the League was the greatest human agency for preserving peace of the world.

Disappointment at the efforts of the League to achieve world disarmament and in the response which had been made to the world dismemberment petition was expressed by Miss Agnes MacPhail, M.P., in a short address.

H. M. T.ory, of Ottawa, was re-elected president of the society and new members were added to the list of officers. Hon. J. E. Smith, Minister of Fisheries, was elected honorary vice-president; H. J. McNulty, of Ottawa, becomes honorary treasurer, and John W. Duff, editor-in-chief of the Winnipeg Free Press, Winnipeg, was chosen as a vice-president.

**Tells Dyspeptics What To Eat**

**Strict Diets Often Unnecessary**

In a well known fact that foods have a strong tendency to produce excesses, stomach aches, and consequent bodily maladies those foods that expand the diet to certain, tasteless unappetizing, and often so slowly overcome the appetite that a person eats etc., are due to excessive weight in the stomach. To keep the stomach clean and to help it to digest the food they want in reason and have no stomach trouble, a person should eat the food daily by merely taking after each meal a glass of water which can be had at any good drug store. Magnets instantly neutralize acids which are naturally secreted in the body while the magnetism of the stomach and most foods means a lot to help your body not only after eating but upon your day after eating protein.

**For Government Radio Control**

**United States Sets Like System**

**Senator Pitt, Democrat, Washington, said in a statement recently, "the American people will not tolerate private monopoly of radio" nor "endure too much blatant and direct advertising by radio."**

"This comes in addition to the action of Canada in adopting government operation of broadcasting with license fees of two dollars a year for receiving sets and a limitation of advertising to five percent of the broadcast time."

"The broadcast system will be a challenge to American radio station owners," he said. "They must prove themselves more satisfactory to the people than the Canadian system, or the government system will inevitably be established in the United States."

**Valuable Medical Assistant**

**Death Of Old Dobie In Notes**

**Montreal**

Medical science lost a valuable assistant with the death of old "Dobie," the 100-year-old work horse whose blood had supplied diphtheria toxin for the treatment of more than 140,000 children.

Old Dobie died suddenly on the farm near here, where 150 horses are kept for racing, breeding, and general work.

He was born in 1900 and a native of the Westem plains.

Years ago old Dobie was the guest of a birthday party attended by local school children.

The actual cost to educate a child in Manitoba in 1930 was \$78.75, while in Saskatchewan it was \$87.10, and in Alberta \$89.30.

**Foolish Prospect**

**Banker Believes Prairie Provinces Will First Feel Effects Of Depression**

"The early out set of a depression is not around a corner but up a hill," in the opinion of B. E. Alley, assistant general manager of the Canadian Bank of Commerce. Arriving at Toronto from a town of the prairies, Mr. Alley, in his observation of the top of the hill from the broad sweep of the prairies. Conditions in the west were promising.

"The best results are to be had at the end of this year," said Mr. Alley, "we shall at least, not have any difficulty in getting up and climbing should be easier."

**No More Bookworms**

Bookworms which used to be such a destructive pest are now said to be almost unknown. So are the human bookworms with the auto, golf and so many other diversions to occupy the spare hours.

A depth of 24,000 feet has been found by the navy in the Caribbean Sea. The discovery is believed to afford a clue to earthquakes.

The cause of most young people turning out bad today is too many good times.

**IN BED WITH BACKACHE**

"Two years ago I suffered with severe pains in the small of my back, and could with difficulty hold myself upright for a week at a time. I went to and from hospital for a month, and they told me they could not keep giving me morphine because they knew it would not do me any good away from the children. I could not bring myself to go to hospital any more. I started going to Kruschen Salts and have had no trouble since.

Kruschen contains vital salts that go right down to the spine.

Since after two years on Kruschen, the sharp pains of

the twinges become less and less frequent,

and pain is less.

If then, you're wise,

you'll prevent the possibility of

having to pay the price of Kruschen every morning.

you'll prevent the possibility of

having to pay the price of Kruschen every morning.

Two years ago I suffered with severe pains in the small of my back, and could with difficulty hold myself upright for a week at a time. I went to and from hospital for a month, and they told me they could not keep giving me morphine because they knew it would not do me any good away from the children. I could not bring myself to go to hospital any more. I started going to Kruschen Salts and have had no trouble since.

Kruschen contains vital salts that go right down to the spine.

Since after two years on Kruschen, the sharp pains of

the twinges become less and less frequent,

and pain is less.

If then, you're wise,

you'll prevent the possibility of

having to pay the price of Kruschen every morning.

**British Buy Canadian Products**

**British Now Providing Excellent Market For Our Wheat, Bacon and Cheese**

Canada is selling more to Great Britain, detailed figures recently tabulated by the British House of Commons

showed.

British purchases of Canadian wheat in the four months ending April 30 amounted to \$9,104,000 hundredweights, or 1,197,000 hundredweights in the corresponding period of 1931. Imports of Russian wheat dropped again. For the month of April, they were only 5,200 hundredweights against 13,837,000 hundredweights in April 1931.

Imports of Canadian bacon for the four months ending April 30, amounted to \$7,273,000 hundredweights, a heavy increase compared to 4,653 for the corresponding period of 1931.

Sales of Canadian cheese for the four months ending April 30, amounted to \$3,405,000 hundredweights in the first four months of 1931 to \$3,056,000 hundredweights this year.

Imports of Canadian cheese had a remarkable increase in the four month period of from \$3,655 to \$21,005 hundredweights.

Salmon from 23,884 to 52,308 hundredweights, unmanufactured Canadian tobacco from 3,880,000 pounds to 6,863,000 pounds (weight), and dried fish from 15,360,000 against 16,160,000 in the corresponding quarter of 1931.

The following table gives the quarterly sales of Canadian cheese in the quarter of last year.

### THE HOUSE OF DREAMS-COME-TRUE

MARGARET PEELER

Author Of  
"The Splendid Palace," "The Hermit  
Hodder & Stoughton, Ltd., London

**CHAPTER XXI.—Continued.**  
She was not sure why, but within herself she knew that no woman would ever be afraid with Geoffrey Burke. Afraid of him, possibly, but never afraid that he would not be entire master of any situation where physical strength and courage were the parts of his make-up.

She reflected a little grimly to herself that it was this very forcefulness which gave the man his unquestionable power of attraction. There is something certain fascinating in sheer, ruthless strength—a savagery of magnificence about it, something tentatively heroic, which appeals irresistibly to that primitive instinct somewhere hidden in the temperamental make-up of even the most ultra-twentieth-century feminine proclivity.

And Jean was quite aware that she herself was not altogether proof against the attraction of Burke's dynamic personality.

There was another kind of strength which appealed to her far more. She knew this too. The still, quiet force that was Tormain's deep, unfathomable strength and silent, subtle power as well as of his own. Contrast with the savage power she recognized in Burke, it was like the fine, tempered steel of a rapier compared with a heavy bludgeon.

"A penny for your thoughts?"

Jean could not get out of her reverie with a smile.

"Don't get conceited. I was thinking about you."

"Nice thoughts, I hope, then?" suggested Burke. "It's better"—audaciously—"to think well of one's husband."

The old gipsy's words flushed into Jean's mind:

"You're bound together so fast and firm as weddin'—you'd bind 'em tight."

It was this, at least so far as she was concerned—that no weddin'-ring could bind her more firmly to Blaise than her own heart had already bound her.

The instinct to flir with Burke was strong in Jean. She had only born of heartache and unhappiness and now that Blaise's mood was so much less cool and distant than it had been, the temptation to play with unexploded bombs had correspondingly lost its fear of chance.

"Do it, Blaise, Geoffrey," she said vaguely. "If only we could make up your mind to be—just pals, I should think much better of you."

"Then I'm afraid you'll have to think twice," he retorted.

At last, however, they encountered a flock of sheep, ambling leisurely along towards them and blocking up the narrow roadway, and Jean was spared the necessity of re-playing by the fact that Burke immediately took his hands full, maneuvering a path for the mate between the broad, curly backs of the bleating multitude.

The driver of the flock was, of

much for human nerves and muscles, and that a man's hands grow numb and helpless! While the dead pull on the bit equally numbs the mouth of the horse, so that he, too, has no more any feeling to be played upon by the pressure of the bit.

He turned to Burke's hands. With a little inward start of astonishment she realized that he was not attempting to pull against the chestnut. He was just holding . . . holding . . . steadily, so very little, in her mind's palpit. Jean felt the mare swerve, then swing level again, still answering faintly to the reins.

Burke's hands were very still. She wondered vaguely why—now—he didn't pit his strength against that of the mare. They must have covered a mile or more. A bare half-mile was that still lay between them and disaster.

And then, as she watched Burke's hands, she saw them move, first slow and then, as she other, bring the bit against the lower corner of the mare's mouth. Jean was conscious of a faint difference in the pace of her. Not enough to be accounted a check but still something, some appreciable slackening of the whirling and rush towards that blue blur of sky ahead.

It seemed as though Burke, too, sensed that infinitesimal yielding to the mare's will, and then there must have a definite pull at the reins. Then he released the pressure, and again there followed the same sawing motion and the fret of the steel bar against sensitive, velvet lips. Then again, with a sudden, unexpected sheer strength against the mare's . . . Jean watched, fascinated.

And gradually, almost imperceptibly at first, the frenzied beat of the iron horse's heart became more measured as the chestnut shortened his stride. It was no longer merely the thudding, thunderous devil's tattoo of sheer, panic-driven speed.

Now and again Jean could hear Burke's voice, speaking to the frightened animal, chiding and reassuring in even, unbroken tones.

She was conscious of no fear, only of an absorbing interest and excitement as to whether Burke would be able to bring the animal under the mare before they reached that precipitous hill the descent of which must infallibly spell destruction.

Silently sat, her hands locked to Burke, watching . . . watching . . .

**Plan Trade Drive**

**Ontario To Place Sales Representatives In Wimipeg, Montreal and Maritime Provinces**

As part of an intensive drive to secure a greater share of the Canadian market, the Ontario Department of Agriculture is placing sales representatives in Wimipeg, Montreal and Maritime Provinces. It was announced by Hon. T. L. Kennedy, Minister of Agriculture. The duties of these representatives, who will work through the Ontario Department, include keeping the department informed as to conditions in the various provinces, the volume of sales of Ontario agricultural products and the means of distribution. The government has been launching a drive for more markets and that up till now much of the effort had been directed toward securing a better foothold in the British market. There was a big increase in the sale of Ontario products in the United Kingdom last year. The Ontario Government already had representatives in London and at the present time W. B. Somersett, chairman of the agricultural board, is in the Old Country in the interests of Ontario trade.

**Anti-Aircraft Gun**

**FRENCH Have Invented Gun That Will Hit Target Seven and One-Half Miles High**

What a remarkable anti-aircraft gun can bring down an attacking bomber seven and one-half miles up in the air, is the claim of those conducting tests on the Riviera coast, near La Seyne, France.

The secret of the gun's神奇 is that it has a special type of gun mount which engineers planned it. Anti-aircraft guns have previously proved effective at a height of about three and one-half miles, but modern aircraft can attain much greater altitude.

In the experiments at Le Bourget, a mechanic ascended seven and one-half miles towing, suspended 1,000 feet beneath it, a target on which the anti-aircraft gun opened fire with live shells.

Aviation, military and navy men of Europe are watching the tests.

Lieut.-Gen. Lord Borden, Baden-Powell, defender of Mafeking in the South African war, a private investor in London, England, has written to celebrate the 25th anniversary of the relief of that little town by Field Marshal Lord Plumer, then a colonel.

Believing one of personal contact with him six months of leave, writing and telegrams after, the Scottish Trade Mission had come to Canada to talk business, the Duke of Monrovia, hon. president of the mission, told the Canadian Club at Montreal.

**Canadian Banking System**

**U.S. Senator Praises System Here In Comparison With That Of United States**

The banking system of Canada's banking system as compared with that of the United States was dramatically placed before the United States senate by Carter Glass, of Virginia, former secretary of the treasury.

Glass was pressing his revision of the banking laws to permit branch banking in the United States.

Canada, he said, had not one bank branch "during this tragic depression" while in the United States 5,000 banks had gone under with losses during the past two years to depositors of \$5,000,000,000.

For years treasury and currency experts have been attempting to get the U.S. to permit branch banking. Their efforts have been consistently opposed by representatives of smaller communities and farming areas who believe in individual and personal banking.

**Necessary Information**

A teacher gave the following problem to her pupils: If a woman gathered five eggs a day, how many eggs would she gather in a week? After studying a few minutes, William, with a pained look finally asked:

"Miss—do hem lay eggs on Sunday?"

**Scotland's Exhibition Ship**

**Enterprise Is Shown By Prominent Business Men From Glasgow**

Scotland has again proved her traditional skill in producing one of Canada's largest and most varied aggregation of Scottish products ever made, on the Anchor-Donalson line "Lettice."

This vessel was used as an exhibition ship for over a hundred different products of Scotland, ranging from bagpipes to boilers. About eighty of Scotland's most prominent business men from Glasgow attended their exhibits and the Trade Mission was headed by Sir Grace The Duke of Montrose.

The object of the exhibition was to foster closer trade relations between Canada and Scotland. The Corporation of Glasgow, which had fitted up the steamer, has a long and varied history to look back on.

Glasgow is the nearest British port to Canada, and the Scottish Government, with Canada, is old date. John Galt, the novelist—a Greenockian, and a contemporary of Sir Walter Scott—was one of the makers of the steamship "Enterprise," built for him in 1812. Captain Alexander Allan, founder of the Allan Line of Glasgow and Montreal—now merged into the C.P.R.—made his first voyage from Clyde to Quebec in 1853. Galt, once linked with the company to which the "Lettice" belonged.

The official history of British Trade with 1782. In that year was founded the first Chamber of Commerce in the British Isles—namely the Glasgow Chamber of Commerce, which is closely identified with the Lettice.

The founder of the Chamber was a pupil of Adam Smith, in Glasgow. Lord Provost Robert Colquhoun, LL.D., who afterwards won European fame as a political publicist, and who has a monument in St. Margaret's, Westminster.

Glasgow as a Cathedral city dates from the time of her patron Saint, St. Mungo, in the 6th century. Her cathedral is the oldest in Britain, and the church of St. Mungo is the 12th century old. Not long after the Reformation, Glasgow's population was nearly 15,000. It was reduced to under 11,000 in the Covenanting Wars, and by the end of the 17th century at the end of the century.

Scotland's object in the Darien Expedition, of which the story has been finely told by a Glasgow historian, Dr. D. MacKenzie, was to open up a new trading emporium in Central America. Spain was hostile, and the English Government was unfriendly. Scotland lost hundreds of lives, and most of her shipping capacity. On the loss of the fleet, the City and Glasgow merchants lost heavily. The failure of the Darien Expedition, however, had much to do with the opening of trade between Scotland and the English colonies, and soon the Union with Virginia, and other American Colonies, by 1760, they had secured a very large share of the European market, and the population of the city had grown to 200,000.

Those Glasgow merchants were the "tobacco lords" who were a distinctive and magnificent contribution to a society which they owned many ships and had large estates on the Clyde and on the Potowmack near Glasgow, were neighbors of George Washington on the banks of the River James, and called their Scottish estate Mount Vernon. An American War of Independence ruined the "tobacco lords and wigs" of Scotland.

Does run the gay way all over Paris, their favorite expression being in blue and white of nautical influence?

That was this scheme that made this chisel waist-coat type blouse in washable silk.

Embroidered a scalloped edge. And note how it is fitted at the waistline. It's the easiest thing in the world to make a waist-coat out of a coat, but you'll be amazed at the enormous saving over the original.

Size No. 414 is designed for sizes 14, 16, 18, 20, 22, 24, 26 and 28 inches bust. Size 16 requires 1½ yards of material with 1½ yards of 4-inch ribbon.

Price of pattern 25 cents in stamp or coin (postage is preferred). Wrap comely.

## DAIL PASSES ACT TO ABOLISH THE ALLEGIANCE OATH

**Edmonton, British Columbia**—Abolition of the parliamentary oath of allegiance to the British crown was given approval of the Dail Eireann, despite a desperate eleven hour attempt to prevent President Eamon de Valera's bill becoming law.

The bill, by a vote of 77 to 69, gave final approval to all four sections of the measure.

Vowing unqualified opposition, J. MacDonnell, Independent, claimed the bill should be withdrawn unless after the Imperial Economic Conference at Ottawa in July. He charged De Valera with harboring " twin hatreds toward the late administration of President W. T. Cosgrave and against England."

"Removal of the oath is a domineering master," stated President de Valera in a brief speech winding up the debate. No sensible person, he asserted, would suggest the bill represented an act of treason against the Free State from the Empire.

The bill provides, besides abolition of the oath, three other constitutional changes.

Of these, the most contentious is the second section, which repeals the anti-parliamentary clause in the oath.

De Valera, with harboring " twin hatreds toward the late administration of President W. T. Cosgrave and against England."

Lowest and furthest debate preceded final passage of the bill, with parties holding intact on each division in the chamber. The Labor group, whose attitude on the issue varied, in doubt as to the time debate started, voted with the government.

The first division came on an amendment put forward by Patrick McGilligan, supporter of William T. Cosgrave. After a sharp discussion the bill was carried, with abstention by a majority of eight, the majority it obtained on the second amendment and on the final vote.

Mr. McGilligan urged abandonment of the oath, but the Dail rejected his motion.

President de Valera, by his statement last March, had obtained a mandate from the people to abolish the oath, but not to make the constitution override the Anglo-Irish treaty.

Taking this oath of allegiance, Mr. de Valera said, was not obligatory unless the Free State made it so by domestic legislation.

The whole question, the president declared, lay in whether or not the Free State could be compelled to consent to the British Commonwealth of nations. Other dominions, he said, could remove the oath if they wished.

"We have the same right and we are going to remove the oath," he emphasized. "It is up to our friends to do so. The people want it removed and we will give effect to their will. We are doing it without any violation of the treaty."

## Spain Requires Wheat

**Government Carrying On Negotiations For Large Purchases**

**Madrid, Spain**—Financial circles are apprehensive over the possibility of foreign banks in an attempt to arrange payment for the contemplated importation of 100,000 tons of wheat (about 375,000 bushels) of wheat.

The result of the negotiations was not known, but the government wanted to spread the payment over periods of three, six and nine months; it was understood, the wheat to be bought from Canada, the United States and Argentina.

Financial circles said a government decree ordering the purchase of the wheat, expected soon, would bring Spain's total imports to 200,000 bushels (about 746,000 bushels), but that it would be necessary to import another 200,000 tons because the new crop is available in Italy, since the domestic supply is exhausted.

### Finance Judges Underpaid

**Ottawa, Ont.**—Canadian judges are too numerous and underpaid, Premier R. E. Bennett told the House of Commons. The judiciary as a whole does not reflect the genius of the legal profession from which it is drawn, and too many instances of political patronage, rather than individual merit, has elevated a man to the bench.

Six hundred firms had exhibits at this year's agricultural implement show in Paris.

Germany exported more shoes last year than in any twelve-month since 1913.

W. N. U. 1943

## Doukhobors Protest

**Write Letter To Press and Send Message To The Hague**

**Vancouver, B.C.**—Doukhobors fearing imprisonment if no parade was granted to the press and various religious organizations, including the anti-militaristic Bureau of The Hague, were protesting against their treatment.

In a letter to a local newspaper, the Doukhobors said:

"It is a tragedy when one misunderstands another. And this is just what is happening today, without any cause whatever. Innocent people are being sentenced to three years imprisonment."

"We know that truth is sought on Golgotha, and will even remain there. We forgive everybody who has mistreated us. But when we come to our own country, their treatment is this:

"We stop them from 'protesting' for civilization to force others into conditions that they are not able to bear. The whole world has been aroused by the Lindbergh case. But what is going on in Nelson; this is worse than kidnapping—drags full of man's inhumanity to the world."

Representatives of the Doukhobors have sent a cablegram to the "anti-militaristic Bureau of The Hague," protesting against their treatment.

"We Doukhobors—Sons of Freedom of Canada—appeal to The Hague," runs the message. "Please raise your voice in the cause of freedom and justice. This is the only way to help us."

"The same conviction awaits the rest—for appearing nude in protest against brutality. Our children, our wives, our mothers, please take this matter seriously or you will be guilty before God and all ideals. Remember our struggle is truth. If you are brothers of same faith you can not be silent."

"(Signed) Sons of Freedom."

## Hunting For "Baychimo"

**Another Search For Ship**

**Powder River, Alaska**—A double search for the "Baychimo," for trading vessel anchored off the Arctic Coast, is in progress.

William R. Graham and Mrs. Edna Christoffersen, Powder River, were the latest searchers to be engaged in the search for the ice-bound ship.

C. RHODES, Secretary

Mrs. P. Dawson and son are visiting at the home of her sister, Mrs. Campbell at Milk River, during the absence of Rev. Dawson, who is attending the church conference in Edmonton.

Mrs. McKinney and daughter Ruth of Clareholm visited with Mr. and Mrs. Farmer on Monday. They motored to Calgary to attend the graduation of Mrs. McKinney's daughter Marion. Mr. and Mrs. Farmer accompanied them.

Mr. and Mrs. R. L. Baker motored to Calgary over the week end. Mrs. Baker remained in Calgary for the Graduation exercises of the nurses of the Holy Cross hospital.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist of 224-8th Ave West, Calgary, will make his monthly visit to Champion, Friday, June 24th, at the Drug store.

WANTED — A regular supply of dressed spring chicken for our week trade — Champion Meats Market

W. S. Ryan of Warner was fortunate in winning several prizes with his dogs, in the annual show held by the Medicine Hat Kennel Club at Medicine Hat on May 24th.

The heavy rain on the 21st, with one and one-sixth inches of rain registered was followed by several light showers. A frost on the 24th caused slight damage to gardens, beans being most severely damaged.

A check up of radio licenses will be made early next month and owners of radios are urged to register with law and avoid the inconvenience of a prosecution. Radio licenses may be obtained from Moffatt's Hardware or from the R. C. M. Police.

FOR SALE — Seed Barley at 5c per bushel. C. H. Sutton — Phone 1244

Too much publicity can hardly be given to the reply made by William Wrigley Jr. when once asked why he did not stop his tremendous advertising after he had built up a gigantic business. His response was: Did you ever hear of trainmen taking off the locomotive after they got the train moving?
